## Report of School Board.

---

At the outset we wish to thank the voters of the school district for the appropriation which has enabled us to continue the schools for twenty-nine weeks during this past year. The result has been seen in the steadier and better work of the scholars. All over the town there has been a keen interest, none the less genuine even if shown in different ways in the different schools. The second result of the better appropriation is that it has been possible to keep our best teachers under contracts drawn for the school year rather than by the term, as formerly. It is a simple matter to understand. Scholars get ahead only when they have full confidence in a teacher. They gain that confidence only by having proved the teacher. So, too, the teacher must know the scholar. It takes almost one term to gain this mutual acquaintance. Hence it is economy for the district to keep teachers who have proved their worth just as long as we can. The year's larger appropriation has made this possible. We have had a majority of experienced teachers. Some of them are as good as can be found in New England towns of our population. It is for our common interest to keep them. But if they can get schools of thirty-six weeks elsewhere, they will not enter into contract for only twenty weeks here. We therefore recommend an appropriation which will give a school year of at least thirty weeks.

As an evidence of the new interest in our schools, we wish to call your attention to the fact that the Primary school at Conway Centre had this last term 143 visits by 80 different people. While this record has not been approached even in other parts of the town, there has at least been a strong interest and a good co-operation with the teachers and Board. For

this we thank all who have helped in making this a year of good results.

The lot at East Conway has finally been enlarged and deeded to the School District. The deeds of the new No. 8 property also are made out to the district. This action has been taken under legal advice from an interpretation of the law which says that the district, not the town, controls school property. Most of our school property at present is held by the town. The selectmen are obliged to look after insurance and sometimes water-rates. But why stop here? Why should they not also look after repairs? In order, therefore, that there may be no confusion, we recommend that the town at its next meeting pass a vote, authorizing the selectmen to deed its school property to the School District, to be held by it as is the clear intent of the law. That simple action will relieve the selectmen of work which does not properly fall to them, and make it possible to keep town and school affairs entirely separate, as well as enable the school board to know just what they are responsible for.

The new building at North Conway has been finished within the appropriation, and legally deeded to the School District. An Intermediate grade was added to No. 8 schools in the autumn, at the beginning of the school year, and has changed very decidedly the tone of work. These scholars have never been more alert and responsive in their work than now. We believe a part of the change is due to pleasant quarters and a system of ventilation which will change the air in each room once in twenty minutes. A great deal of thought and study have gone into the remodeling of this building, and the ideas incorporated seem to meet with general approval. We wish in this connection to thank the Woman's Club of North Conway for the gift of thirteen framed portraits of authors and statesmen. These pictures are a great addition in the way of making our school-rooms more home-like, and are an education in themselves.

One planned piece of work must go over to another year, and that is a revision of the course of study. We had hoped to add some very practical subjects and change the proportion

of time given to certain studies at present. A very practical need in all our schools is in the matter of reference books and school libraries. We hope the suggestion of one of our citizens can be carried out, namely, that arrangements be made with the trustees of the town library to have certain books purchased by the annual appropriation and sent from school to school as a town traveling library.

Again we would thank the voters of the district for their good-will and co-operation, and bespeak their patience for the work of the future. We trust our schools will not be permitted to drop below the present level and will be pushed steadily higher with each year to come.

W. B. ALLIS,

ABBIE M. D. BLOUIN.
